DETAILED ACTION

Response to Amendment

Applicant's arguments with respect to amended claim 1 based on the Response filed on 8/21/2006 have been considered but are moot in view of the new ground(s) of rejection. Therefore, this is Final action.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

1. Claims 1 and 24-32 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim 1 recites "the auxiliary electrode line is formed between the pixel electrode and the data line at an outside of the pixel electrode in the pixel region and the auxiliary electrode is overlapped with the pixel electrode, but not overlapped with the data line".

Figure 2 shows that the auxiliary electrode (surrounding the pixel electrode but not connecting to gate line) is overlapped with the pixel electrode and also overlapped with the data line.

Fig. 4 shows that the auxiliary electrode line (extending from and connecting with gate lines) is formed between the pixel electrode and the data line at an outside of the pixel electrode in the pixel region and the auxiliary electrode 22 is not overlapped with the pixel electrode 24, but also not overlapped with the data line (see attachment).

Therefore, the combination of the features

- (a) the auxiliary electrode line is electrically connected to gate line.
- (b) the auxiliary electrode is overlapped with the pixel electrode,
- (c) the auxiliary electrode is not overlapped with the data line

is not disclosed in the original disclosure. This combination arises the new subject matter.

Claims 24-32 are rejected since they depend on the infinitive claim 1.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
